

WAC LIGHTING

Straight Edge® 144" Extension Cable

Model & Product

SL-EXT-144 144" extension cable for LINE and Straight Edge

Example: **SL-EXT-144**

DESCRIPTION

Connectors for WAC Lighting Line, LINE 2.0, and Straight Edge under cabinet fixtures. I-connectors are used to join two fixtures for a seamless end to end connection. Joiner cables are used to join one fixture to another on a single power source, available in four sizes, 6", 12", 24", and 36". Use an SL-IF custom extender to create longer runs of joiner cables. Y and X connectors are used to create three-way and four-way connections. 144" extension cable is used to supply power to fixture from a far power supply.

FEATURES

- 5 year warranty
